

**DID YOU KNOW?
CHRISTMAS
IS THE MOST DANGEROUS
TIME OF YEAR.**

There's shopping, and over-extending your credit card.

There's eating, and gaining those holiday pounds.

***And then there's the most dangerous of all -
holiday decorations.***

Putting up Christmas decorations puts over 5,000 people in the hospital each year.

Tripping over tree skirts, and other décor, causes an additional 600 trips to the ER.

And decorative lights light up an average of 230 homes in fire each holiday season.

Christmas is a magical time of year.

Be safe, and don't let the magic turn to misery due to an accident or fire.

CHRISTMAS
is the best time of year...

to be embarrassed by your family in person
instead of on facebook.

If you're concerned about having a happy and safe Holiday, just give our office a call for a

Free Holiday Safety Guide.

Pick up the phone and call 435-414-1525.

Our Guide has tips on choosing the right Christmas tree, holiday light safety, and other timely information.

One of these tips is about Christmas tree lights: Connect no more than 3 strands of miniature string sets (or a maximum of 50 bulbs) at a time.

Christmas trees are the major cause of fires at Christmas. You're at more risk to die from a fire at Christmas than any other time of year.

We might not be able to help you stay away from the food, or keep your shopping in check, but we can help your home stay safe.

And Remember, there's no better gift at the Holidays than a new home.
